GITHUB LINDEDIN PORTFOLIO

PROFESSIONAL SUMMARY

As a MERN stack developer, I bring a strong foundation in front-end technologies like HTML, CSS, and JavaScript, coupled with advanced proficiency in React.js and its ecosystem. My expertise extends to developing reusable components, managing state effectively through Redux, and integrating APIs seamlessly for scalable and robust solutions. With a focus on optimizing performance, adhering to best practices, and ensuring cross-browser compatibility, I contribute as a collaborative team player with excellent problem-solving skills. My passion for staying updated with the latest trends in web development drives me to deliver innovative solutions that exceed client expectations.

PROJECTS

E-LEARNING WEBSITE (USING MERN STACK)

- Architected and developed a scalable single-page application using the MERN stack with robust user authentication and authorization using JWT.
- Designed and implemented RESTful APIs with Express.js for handling course and lecture data, leveraging MongoDB for efficient storage and retrieval, and integrated Razorpay for secure and seamless payment processing and transaction management

RESUME BUILDER WEBSITE(USING REACT.JS & FIREBASE)

- Architected an interactive resume-builder application utilizing React.js and integrated Firebase for user authentication, real-time database operations, and hosting services. Employed Redux for state management to streamline data flow and maintain application state consistency.
- Leveraged Firebase Firestore for real-time data persistence and retrieval, providing instantaneous updates to users. Implemented continuous deployment workflows using Firebase Hosting for automated updates . Git and GitHub for version control and code management.

MEDIA PLAYER WEBSITE(USING REACT.JS & JSON SERVER)

- Engineered a responsive and interactive media player application using React.js, implementing JSON Server to simulate a RESTful API for efficient media content storage and retrieval. Integrated React Router for seamless navigation, and ensured responsive design and enabling a dynamic user experience.
- Created dynamic playlists for real-time addition, removal, and reordering of media items, utilizing fetch API for CRUD operations with JSON Server. Create History ,make categories with drag and drop & also Git and GitHub for version control.

FOOD RECIPE SEARCH WEBSITE(USING REACT.JS & API)

- Used React Router for smooth navigation and reusable components for recipe lists and details. Optimized performance & Git/GitHub for version control.
- Created responsive UI with CSS, Bootstrap, React.js. Integrated APIs for detailed recipe displays with images, videos, instructions. Used Axios for API handling, React Hooks (useState, useEffect) for state management.

DEVELOPER GAME WEBSITE(USING REACT.JS)

- Designed and implemented interactive game components using React.js for a maze-based game with dynamic maze generation and navigation logic.
- Utilized Redux for state management to handle game state, including player position, maze structure, and game progress tracking.

EDUCATION

ME(A)RN FULL STACK DEVELOPMENT
Web Development
Luminar Technolab Kochi
2023 September -2024 April

STATE BOARD OF TECHNICAL EDUCATION
Diploma in Computer Engineering
Carmel Polytechnic College, Alappuzha
2020 -2023

Higher Secondary
Computer Science
Holy Family Higher Secondary School ,Cherthala
2018-2020

Higher School
Tenth
St Theresa's High School, Manappuram
2018

AWARDS

National Council for Technology and Training
MERN/MEAN Full Stack Course
(April 2024)

ACHIEVEMENTS

- Implemented JWT-based user authentication for enhanced security in the MERN stack.
- Optimized MongoDB queries using Mongoose schemas for efficient data manipulation.
- Integrated third-party APIs to extend functionality and improve user engagement.
- Employed Express.js middleware for streamlined request handling and routing in Node.js backends.
- Developed responsive web apps using React.js
- Showcased expertise in front-end development with React.js
- Engaged with the developer community through GitHub
- Applied responsive design principles in React.js projects.
- Integrated API calls and data fetching techniques in React.js applications

SKILLS

TECHNICAL SKILLS

- Programming Languages: JavaScript (ES6+)
- Web Technologies: HTML5, CSS3
- Frontend Frameworks/Libraries: React.js, Redux (basic understanding)
- CSS Preprocessors: Sass,Tailwind Css
- API Integration: Axios &Postman for API testing
- Version Control: Git, GitHub Development Tools: Visual Studio Code, npm

SOFT SKILLS

- Communication
- Problem-solving
- Adaptability
- Teamwork
- Programming
